EXPERIENCE

Associate Software Engineer

Sept 2024 – Present

Opentext, Bangalore

- Upgraded ContentConnect from Node.js 20 to Node.js 22, refactored legacy codebase, and implemented background service functionality, enhancing application stability by 25%.
- Developed automation scripts using PowerShell modules and MS Graph APIs for product demonstrations, reducing manual demo tasks by 90% and improving sales team efficiency.
- Resolved 30+ critical production bugs across ContentConnect (Outlook Add-in) and SmartView M365 (Teams Add-in), improving system reliability and user satisfaction for 96+ global enterprise clients.
- Optimized Docker container images by 20-40% (eliminated 500MB-1GB wastage), accelerating deployment speed and reducing infrastructure costs.
- Implemented document check-in/check-out features for enterprise content management application, streamlining document workflow processes.
- Contributed to Helm chart optimization for Kubernetes deployments, improving CI/CD pipeline efficiency.

Software Engineer Intern

May 2024 – Aug 2024

Opentext, Bangalore

- Automated OpenText D2-Smartview application end-to-end testing using Selenium WebDriver and Java, creating 70-80 comprehensive test cases and reducing manual testing efforts by 80%.
- Collaborated with QA team to identify and resolve critical bugs during regression testing cycles, ensuring product quality before releases.

PROJECTS

PahadiLingo - Cultural Language Learning Platform

Sept. 2023 – Present

Technologies: React.js, Firebase. || 🔄 📄

- Developed cross-platform web application promoting Pahadi language and culture with seamless user experience across devices.
- Engineered user-friendly search functionality enabling quick word lookups and favorites feature for bookmarking preferred words.
- Designed engaging project architecture encouraging active content creation, resulting in 50+ community linguists contributing to evolving database.
- Implemented Firebase authentication and real-time database for secure user management and dynamic content updates.

VideoTube - Video Streaming Backend Platform

Dec 2024 – Present

Technologies: Node.js, MongoDB, Express.js || 🔄

- Architected scalable RESTful backend API with 35+ routes implementing JWT-based authentication and role-based authorization.
- Optimized database queries using MongoDB aggregation pipelines and index-based searching, improving response time by 40%.
- Implemented secure file upload functionality with Multer middleware supporting video and image processing for streaming platform.

Talkies - Real-Time Chat Application

Apr 2024

Technologies: MERN Stack, Socket.io, WebSockets, RESTful APIs. || 🔄 📄

- Built real-time bidirectional chat application using WebSockets enabling instant messaging with 99.9% uptime.
- Implemented secure user authentication and authorization with JWT tokens, password hashing, and salt-based encryption.
- Designed responsive user interface using React.js and Styled Components with CRUD operations for message management.

- Developed robust backend infrastructure managing user registrations, authentication processes, and real-time message delivery.

ACHIEVEMENTS

- Solved **500+ coding problems** with **1400+ rating** on *LeetCode*, demonstrating strong problem-solving and algorithmic skills.
- Achieved **5-Star rating** in **Java, C++, and Problem Solving** on HackerRank, ranking in top 5% of developers globally.
- Strong expertise in **Object-Oriented Programming concepts and Data Structures algorithms in Java**.
- Completed certifications: **Advanced Web Development, AI - Attention in Transformers, JavaScript Essentials, Machine Learning: Regression**.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering Chitkara University, Rajpura, Punjab	 2020–2024 9.0 CGPA
Higher Secondary Education (12th Grade) Army Public School, Uttarakhand	 2018–2020 81.8%
